

HIGH PERFORMANCE BALLS! 2/2013

VOW

Columbia bowls the world over.®

Big Scores! The Vow is easy through the front of the lane and creates a strong and continuous motion throughout the backend. Players with higher rev rates will see a skid flip motion while players with medium to lower rev rates will see a strong breakpoint with great continuation. The move on the backend is impressive no matter how you throw the ball and you'll love the versatility the Vow provides.

Release Date

NANODESU Accu-Line Limited 2013

Check out the ACCU LINE LIMITED 2013! Just as the name states it is limited so be sure to get yours before it is gone! Looking back to the original ACCU LINE LIMITED we wanted to tweak the proven performance by introducing the AVEX limited 2013 cover stock paired with the Big Shuttle core. This multi colored ball combines 3 types of particles as well as a 2 part synergy cover mixture. The result is a smoother and faster flow out of the gate with serious friction in the backend. We cranked it up on the factory finish from a 3000 polish all the way up to 10,000; this helps to prevent the ball from hooking too early and insuring control as well as performance.

Mid FEB.
Release Date

PRO-AM BLACK INVADER

Black by popular demand! Here is the second in the Pro Am series the Black Invader. Just flying off the shelf is the only way to describe how popular the Invader series is! Pre ordered ...back ordered ...out of stock ...sold out! The debut of the first Pro Am Invader Multi ball was marked with several 800 series as well as championship titles. The Black Invader is set to follow its predecessor with more proven performance and happy bowlers on the lane.
