TANK

The Tank™ is built to dominate with a powerful impact on high friction lane conditions. It crushes the pins with a strong, controlled ball motion. Armored with our new Ballistix™ Urethane cover, The Tank™ is sanded to a 2000 grit finish. Allying this finish with the low RG / low Diff Gear™ core, this machine is put into motion early, driving down the lane with powerful control and smooth predictability. It hits the pins with a devastating impact. Competitive bowlers with higher rev rates will really benefit from the smooth strong motion the Tank™ provides on broken down, high friction lane conditions.

408A/C

Here is the latest in the 4 series from Track, the 408A/C. This is the ultimate fusion ANGULAR & CONTROL (A/C). The UMP GEN 2 coverstock is paired with the proven Shuttle core for magic on the lanes! It starts out with a steady roll out of the gate and through the mid lane with heat seeking missile accuracy. Onward to the backend with explosive ANGULAR action... the result can only be described as CRAZY PIN ACTION! Please note this a Limited Release
