

HIGH PERFORMANCE BALLS! 9/2013

NANODESU Accu-Swing VII

Some think 7 is a lucky number and we think it is strong too! The ACCU SWING VII is one for the record books with the strongest core to date in the series... none other than the VGI BULB with Magnet... doing pushups with one hand! What is the secret? Start out with a high Δ RG and lower the RG for beefed up power in the backend.. Slap that together with an ultra thin Nanoxy Special Pearl With Fulleren C60 coverstock..... and BAM! You've got some unbelievable pin action to deal with!

Release Date

THE KINETIC HYBRID

Check out the latest exclusive Japanese release from Track... The Kinetic Hybrid. Look for some serious skid and firm grip in the backend. The performance is proven with the Shuttle Core and the HP GEN 2 HYBRID REACTIVE coverstock, this time around we tweaked things by matching solids in a fusion of solid dark blue with red pearl. This combination pushes performance on all points of the lane.

TRIBAL

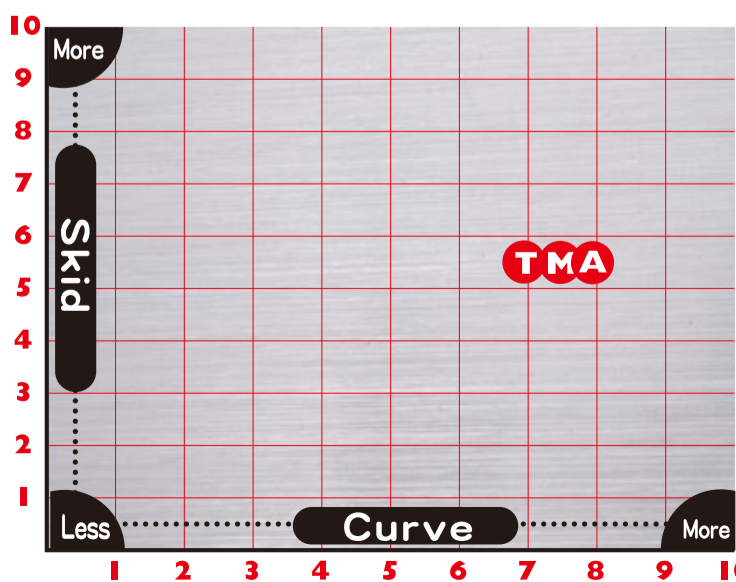

Here is the latest ball for our friends at Motiv... TRIBAL, featuring the Fusion Pearl Reactive coverstock .Paired with the Halogen core for an unprecedented hook and high friction in medium to heavy lane conditions. The TRIBAL ball will give a lighter skid with sharp backend reaction and make short work of anything on the pindeck.
