

COMMANDER ALPHA

From great to better and beyond! The Specs on our new Commander Alpha are off the charts! The plan started with our newest DRIVE core pumping out a medium mass bias gearing this ball for increased carry down and stability. This sets the stage for some hard hitting hook action in the backend. The Premium Hybrid cover stock is in a class of its own, with some serious catch power producing bone shaking friction on the lanes!

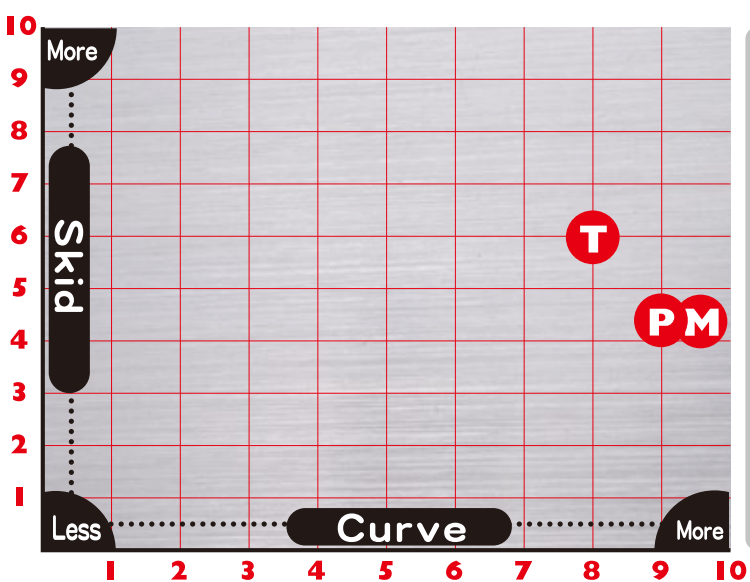

MX10

For the Mx10, we wanted to create a ball that offered moderate length with a strong backend end reaction for those with medium rev rates. In order to achieve the targeted ball motion, we've combined a brand new cover with a young but successful core design.

COVERT REVOLT

The Motiv Covert Revolt has been designed for medium-heavy oil conditions. The Turmoil HFS cover and Vanquish weight block provide a strong motion and continuation with strong, early hooking power that create huge force on the pin deck. The Covert Revolt provides competitive bowlers a ball in the arsenal for fresh, higher volume oil patters. For low-rev and high ball speed bowlers the ball will be a more versatile on a wider variety of lane conditions.

| Brand | Ball | Coverstock | Core | RG | ΔRG | Weights |
|--------|-----------------|---------------------------------|--------------------------|-------|-------|-------------|
| PRO-am | COMMANDER ALPHA | Select™ Premium Hybrid Reactive | Drive™ Asymmetrical Core | 2.500 | 0.054 | 12 ~ 16 lbs |
| TRACK | MX10 | MR-6 Hybrid | Face | 2.500 | 0.049 | 12 ~ 16 lbs |
| MOTIV | COVERT REVOLT | Turmoil™ HFS Reactive | Vanquish™ | 2.470 | 0.056 | 12 ~ 16 lbs |
