

## The MOMENTUM GOLD

In celebration of the 50th Anniversary of ABS, Columbia 300 has produced The Momentum Gold the second in a series of "50th" balls in a striking gold and white caramel swirl. The Momentum Gold is all about catching oil, by maxing out the absorption potential in the NE2 MAXX / POWDER coverstock we have a recipe for success in the mid lane and right into the pocket. By maintaining power through to the backend The Momentum Gold will surely satisfy bowlers with serious performance on the pin deck. This ball is available for a limited time so get yours today!

## NANODESU Accu-Swing VIII

Here we go with the ACCU SWING VIII, stable ball motion in a wide range of oil conditions. If you are starting in a fresh lane or bowling on a well traveled pattern the ACCU SWING VIII will be the ball for you. We paired our Nanoxy Special Solid with Fullerene 60 against the VGI bulb core with magnet for a synergy of performance that will go down in the record books. The VGI bulb core with magnet has impact absorbing features which help produce sweeping pin action that bulldozes the pins

Release Date

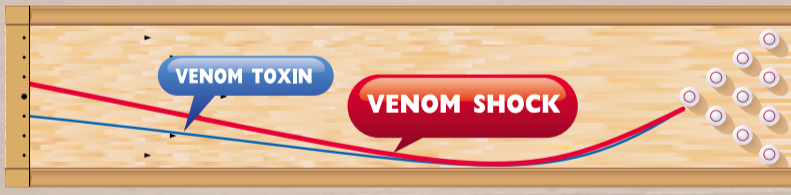

## VENOM SHOCK

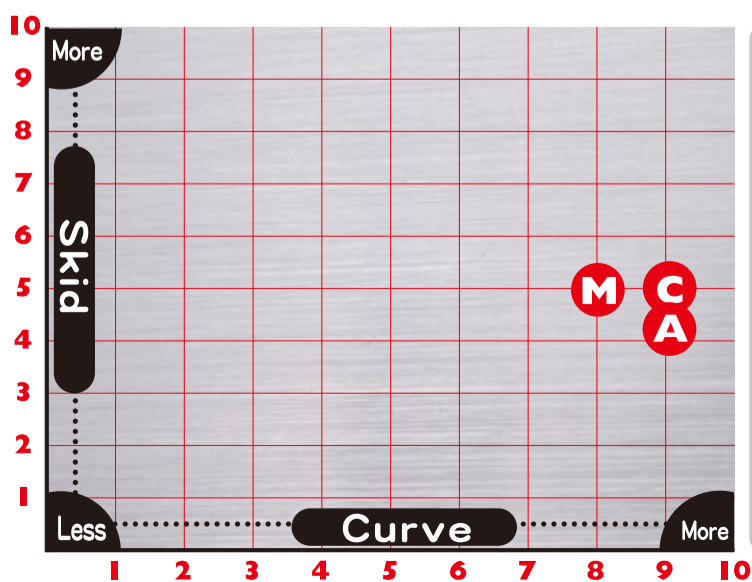

The new solid purple Venom Shock produces a violent reaction on light to medium oil conditions. It attacks the lane with the proven Gear™ weight block and new cover technology - Turmoil™ MFS (Medium Friction Solid) Reactive, which is a modified version of the more aggressive shell featured on the Covert Revolt. This core and cover combination provides a smooth yet angular backend motion that strikes with devastating continuation.
