

## Made Only In Japan..

Here is the newest release from ABS in the ACCU SWING series, ACCU-SWING III, equipped with our very own (GMI core)GEAR- MASS- IGNITION. The GMI core helps account for restless axis migration gearing up or down depending on the conditions. Pushing stronger reaction in the Mid-Lane and producing an Angular- Arc reaction in the backend. The result is decapitating from the bottom up pin action.

The NANOXY Super Solid coverstock is enriched with NANO carbon FULLERENCE C60, giving a hard yet absorbent grip in oil and traction in dry.

●RG : 2.480 ● $\Delta$ RG : 0.054 ●Coverstock : NANOXY Super Solid With Fullerence C60

●Core : GMI With Magnet ●Hardness : 74~76° ●Weights : 11~16lbs

●Finish : 500, 500, 3000 POLISH

**ON SALE!!**
