600, 1000, 2000  
polish

Weights  
12 ~ 16lbs  
Hardness  
74~76°

Coverstock  
Laser Reactive  
with MICA

Ceramic core

The wait is over! It has been about 1 year since that last release of an ABSolution series ball and this one will hit you like a laser! By using the 4 piece ceramic core we were successfully able to bring the RG down to rockbottom, while raising the Diff RG through the roof. Looking back to the lane catching ABSolution JET, the hook potential for the LASER is in a league of its own.
