

Pure Line III NANO-DESU

Introducing the Pure Line III, the latest edition to the Pure Line series, featuring our original Premium Urethane III Plus Nano, Fullerene-C60 coverstock. Paired with the proven GMI core we have all the components for success on the lanes. The GMI core is the compass and you will find that it is accurate in the backend. Great in heavy or light conditions, the Pure Line III is a consistent performer with surprising pin action compared to the typical Urethane performance ball.
