

VENOM TOXIN

Black light

The Venom Toxin™ displays bright colors as a warning - This hybrid is deadly! On light to medium oil, it is clean down the lane with a smooth, but angular backend that strikes with destructive force. At the heart of the Venom Toxin is the proven Gear™ core. It produces a low RG for easy revs and a low differential to tame track flare and retain striking power.

The cover on the Venom Toxin is a new twist on Atomix technology called Hybrid Radial Reactive, aka Atomix HR. It skids cleanly down the lane, then attacks on the backend with devastating power.

- RG:2.480 ●△RG:0.034
- Coverstock:Atomix™ Hybrid Radial Reactive
- Core:Gear™ ●Hardness:74~76°
- Color:Neon Green / Green Pearl ●Weights:12~16lbs
