

TANK

The Tank™ is built to dominate with a powerful impact on high friction lane conditions. It crushes the pins with a strong, controlled ball motion. Armored with our new Ballistix® Urethane cover, The Tank™ is sanded to a 2000 grit finish. Allaying this finish with the low RG / low Diff Gear™ core, this machine is put into motion early, driving down the lane with powerful control and smooth predictability. It hits the pins with a devastating impact. Competitive bowlers with higher rev rates will really benefit from the smooth strong motion the Tank? provides on broken down, high friction lane conditions.

- RG: 2.508 ● ΔRG: 0.051
- Coverstock : Ballistix™ Urethane ●Core : Gear™
- Hardness : 74~76° ●Color : Green Camo
- Weights : 14~16lbs ●Finish : 2000 Grit Sanded
- Condition : LIGHT~DRY
