INDUSTRY'S FIRST. USES ALKALINE ION WATER!!

Oil Removal Cleaner

# ION POWER S

Ion Power S, uses a combination of strong alkaline ion water and nonionic surface active agent, a new type of ball cleaner which removes both oil debris and cleans dirt from the surface of the ball. The strong alkaline ion water absorbs the oil to the surface of the ball; the nonionic surface active agent collects the oil and dirt from the surface. The cleaner is water soluble which does not damage the surface of the ball with continued use.

# Oil removal and Dirt Cleaning using 1 bottle! Oil Removal Cleaner ION POWER S

Strong Alkaline  
Ion Water

How does it work?? Ion Power S is a specialized water soluble cleaner which removes both Oil and cleans dirt from the surface of the Ball.

## Revive your ball!

Removes oil and cleans dirt from the surface of the bowling ball without damaging the coverstock. The combination of strong alkaline ion water absorbs the oil to the surface; and the nonionic surface active agent removes the oil and dirt from the surface. The strong alkaline ion water is easily absorbed; brings the oil to the surface of the ball more efficiently. Also it has antimicrobial properties.

### Cleaning Effect of strong alkaline ion water

Soap Effect	Absorption and Osmotic Swelling Effects	Separation Effects	Emulsion and Dispersion Effects
<p>Strong Alkaline Water Electrolysis = SOAP</p> <p>Alkaline ion water contains properties which help dissolve dirt, creating a detergent like effect on stubborn oil and debris.</p>	<p>Water Electrolysis</p> <p>The Strong alkaline ion water efficiently absorbs and infiltrates dirt and oil to the surface of the bowling ball.</p>	<p>The negative ion in the alkaline ion water absorbs the positive ions in the oil and dirt; and separates the debris from the surface of the bowling ball.</p>	<p>The strong alkaline ion water disperses and emulsifies the oil and dirt, for efficient cleaning.</p>

Use: Spray Type	Use: Moose Type
<p>1 Spray the product 2~3 times on the ball surface.</p> <p>2 Wait for 10~20 seconds to ensure the oil floats to the surface.</p>	<p>1 Push down on the nozzle 4~5 times to get the moose on the ball surface.</p> <p>2 Distribute the foam evenly on the ball surface and wait.</p>

3 Wipe the cleaner with a towel. Recommended use of cleaner before and after bowling for maximum effects.

- The product uses strong alkaline ion water.
- Only for use on Bowling Ball Surfaces.
- Wash Hands after use.
- If the liquid comes in contact with the eyes wash immediately with water, and seek medical attention if necessary.
