

Accu-Swing VII

Some think 7 is a lucky number and we think it is strong too!

The ACCU SWING VII is one for the record books with the strongest core to date in the series ...

none other than the VGI BULB with Magnet... doing pushups with one hand! What is the secret?

Start out with a high Δ RG and lower the RG for beefed up power in the backend..

Slap that together with an ultra thin Nanoxo Special Pearl With Fullerene C60 coverstock..... and BAM!

You' ve got some unbelievable pin action to deal with!

- RG : 2.460 ● Δ RG : 0.058
