Here we go with the ACCU SWING VIII , stable ball motion in a wide range of oil conditions. If you are starting in a fresh lane or bowling on a well traveled pattern the ACCU SWING VIII will be the ball for you. We paired our Nanoxy Special Solid with Fulleren C60 against the VGI bulb core with magnet for a synergy of performance that will go down in the record books. The VGI bulb core with magnet has impact absorbing features which help produce sweeping pin action that bulldozes the pins

- RG : 2.460 ●ΔRG : 0.058
