

The ACCU-LINE PREMIUM series can be credited for a long list of JPBA victories including the Japan Cup! Top that with a record of 800 series and you have a proven formula for success on the lanes. We have kept the specs the same as not to mess with perfection only tweaking the cover for a bit more catch down the lane, you will also see more control in the skid for pin point accuracy. Be sure to check out the ACCU-LINE PREMIUM 2015 and witness the perfection!

- RG : 2.460
